

Zuite SCM

WHAT IS SUPPLY CHAIN MANAGEMENT?

SAP SCM is a complete, end-to-end supply chain management solution designed to meet the needs of the complex, multinational organizations but also smaller organizations. The solution comprises several applications that support all aspects of supply chain management such as:

- Demand Planning and Forecasting
- Supply Network Planning
- Order Fulfillment
- Manufacturing
- Customer and Supplier Collaboration

Why SAP Supply Chain Management?

Do you lack visibility in your supply chain in terms of quickly identifying future problems such as stock outs and getting the wrong mix of products into the warehouse?

SAP SCM is the market leader in supply chain planning software and with the right implementation approach it will support you to

- Achieve decreased costs by:
 - Reduced operational expenses
 - Better order, product, and execution tracking
 - Reduced inventory and higher inventory turns
- Achieve Increased revenues by:
 - Higher customer satisfaction through:
 - Delivery accuracy
 - Collaboration
 - Visibility and responsiveness

Zuite SCM Expertise

Zuite SCM consultants have the best and latest knowledge and experiences within SCM processes and SAP's SCM product range specifically in:

- Demand and Supply Planning
- Global ATP
- Customer and vendor collaboration
- Event Management
